WikiAnesthesia
A crowdsourced guide to anesthetic management

Barrett Larson, MD
Clinical Assistant Professor
Department of Anesthesiology
Stanford University School of Medicine

Chris Rishel, MD, PhD
Clinical Instructor / Postdoctoral Fellow
Department of Anesthesiology
Stanford University School of Medicine

1

What should I plan for?

2

What’s standard practice here?

3
Current Resources

- Textbooks
  - Poor portability
  - Poor searchability
  - Poor accessibility
- Web Search
  - Can be overwhelming
  - Time consuming
- Institutional Resources
  - Not universally accessible
  - Limited to an institution
  - Not always available
  - Not always reliable
- Word-of-Mouth
  - Not always reliable
  - Time consuming

Current Challenges

- Overabundance of information
- Hard to quickly find what you need
- Lack of organization & uniformity
- Key data is not prioritized
- Hard to access at point-of-care

Opportunity

- Improve Accessibility
  - Improve information accessibility and optimize around use at POC
- Provide Organization
  - Apply a simple and standard structure to make it easy to find key data and prioritize information
- Encourage Collaboration
  - Provide a framework for collaboration and sharing of knowledge
WikiAnesthesia: An open-access, collaboratively developed repository of anesthesia knowledge
